12. (Currently Amended) A system for forming an injection molded plastic part in a mold comprising:

a mold, said mold having a part-forming mold cavity therein;

sealing members for sealing said mold cavity and preventing gas leakage therefrom;

a first gas source for supplying a gas into the mold cavity to pre-pressurize the mold cavity to a first pre-determined value;

an electrical infinitely pressure controlled a-gas-pressure valve for removing said pre-pressured gas from the mold cavity as desired;

a gas control mechanism for maintaining the gas pressure in the mold cavity at a second pre-determined value;

a source for injecting molten plastic material into the mold cavity;

a gas pin assembly for supplying gas into the plastic material in the mold cavity;

and

a second gas source for supplying gas to said gas pin assembly.

U.S.S.N. 10/770,932

3

LC 0148 PUS

13. (Original) The system as recited in claim 12 further comprising:  
at least one ejector pin assembly for ejecting the completed plastic part from the  
mold cavity.

14. (Original) The system as recited in claim 12 wherein said first and  
second gas source are the same source.

15. Cancelled.

16. (Previously Presented) The system as recited in claim 12 further  
comprising a pressure switch for controlling the operation of said valve.

17. (New) The system as recited in claim 13 wherein said gas pin  
assembly and ejector pin assembly are combined in one assembly.
